SOFTWARE ENGINEER II

3+ years of experience in the E-commerce domain, specializing in full-stack development with a primary focus on backend development.
Sound knowledge of Core Java and the Spring framework, with extensive experience in Spring microservices. Skilled in Agile methodology, problem-solving, and effective communication with teams and clients.
Currently seeking a challenging position where I can continue to grow and contribute to impactful projects.

Techinical skills :

Language & Framework : Java , Spring boot , Javascript , Angular , NodeJS , SQL
Tools : Gradle , GIT , JIRA , Jenkins , Docker , Kubernetes , AWS , GTM (Google tag manager)

WORK EXPERIENCE

Apexon | *2021 – 2024*

Project	The Vitamin Shoppe [06/23 – 09/24]
Technology	Java , Spring boot, gradle, SQL, Postgres, AWS, Jenkins, Kubernetes, Docker, Shell Scripting
Summary	Contributed in migration of monolithic to microservice architecture by implementing new APIs and migrating existing ones. Acquired hands-on experience with CI/CD pipelines utilizing Jenkins, alongside practical exposure to AWS, Kubernetes, and Docker. Migrated exisitng scripts to new spring microservices and cronjobs.
Roles & Responsibilities	1. Develop end to end solutions for new features. 2. Analyze and suggest solutions before starting implementation. 2. Quick bug fixes and actively add test cases for newly implemented code. 3. Follow agile framework and contibute in story grooming sessions.

Project	Fabindia [12/22 – 05/23]
Technology	Java , Spring boot , Javascript , NodeJs
Summary	Developed APIs specific to business requirements, while ensuring code quality through SonarQube analysis and wrote test cases using JUnit for functionality validation. Played an integral role in collaborating closely with cross-functional teams to fulfill both backend and frontend tasks aligned with business needs.
Roles & Responsibilities	1. Complete the assigned tasks in timely manner. 2. Communicate / Brainstorm ideas with the team to discuss and finalize approach for business requirements.

Project	Juvlabs [10/21 – 11/22]
Technology	Javascript , BackboneJS , ExpressJs, NodeJS , Grunt
Summary	Integrated Google Tag Manager (GTM) for analytics focused tasks. Hands on experience to AWS Lambda for hosting applications. Additionally, conducted POC and proposed suitable products for integration into the new platform to enhance its capabilities.
Roles & Responsibilities	1. Complete the assigned tasks in timely manner. 2. Collaborative discussions with business to analyze and finalize project requirements.

EDUCATION & CERTIFICATIONS

Bachelor of Engineering   [2014 -2019]
Shivajirao S Jondhale College of Engineering

C , C++
NIIT Academy

ACHIEVEMENTS

Pat on the back
Recognized for consistently delivering high-quality code within established deadlines
